Intro Video

<https://drive.google.com/file/d/1VeCVYbcbdTtcLtOhtDpyWORbhcQVJb1e/view?usp=sharing>

I design complex product systems — flows, architectures, and interfaces built around real user behavior and technical reality. I research before I sketch, map before I build, and code what I design. 4+ years leading end-to-end design across SaaS, fintech, and enterprise products, from research and strategy through high-fidelity prototyping and developer handoff.

SKILLS

- Design Tools:** Figma, Adobe XD, Illustrator, After Effects, Canva
- UX Competencies:** User Research, Usability Testing, Information Architecture, Wireframing, Prototyping, Accessibility (WCAG), Design Systems
- Dev Awareness:** HTML, CSS, Design-to-Dev Handoff (Figma Inspect, Zeplin)
- Other:** Product Strategy, Motion Graphics, Cross-functional Collaboration, Visual Communication

PROFESSIONAL EXPERIENCE

- Product Designer** | Motionhash (SaaS Explainer Video Studio) Jul 2024 – Present
- Own product design across client engagements: take a client's product through its existing Figma files and UX, then research the market, positioning, and audience to define what a video needs to communicate and why.
 - Translate that research into structured storyboards — narrative flow, screen sequences, and UI moments mapped to real product behavior.
 - Design UI work at whatever scope the project needs, from single components to full interface systems, used directly inside explainer videos.
 - Collaborate with writers, animators, and clients to keep design decisions aligned with product goals and business outcomes.
- Freelance UX/UI Designer** | Self-Employed (Upwork & Fiverr) Oct 2021 – Present
- Level 2 Seller (Fiverr) · Rising Talent (Upwork) — ran overlapping client contracts across fintech, SaaS, and social platforms.
- GP Flow — B2B Fintech SaaS** 6-month contract
- Designed core product components and end-to-end flows for a B2B fintech SaaS platform.
- Social Travel Platform (Confidential Client)** 12-month contract
- Delivered UI/UX for a social networking app for travellers, owning product flows and interface design across a year-long engagement.
- Procuzy — Procurement SaaS (via Briya)** 12-week contract
- Designed the investor-facing platform and core UI system for a procurement SaaS product.
- Snapshot Reviews** 6-month contract
- Led UI/UX for onboarding and review-management flows, run concurrently with the GP Flow, travel platform, and Procuzy engagements above.
- User Experience Designer** | Lillup, San Francisco Bay Area (Remote) Jul 2024 – Feb 2026
- Designed multiple user flows optimizing end-to-end journeys across the platform.
 - Conducted accessibility-focused color research for colorblind users, aligned with WCAG guidelines.
 - Delivered production-ready UI components, including mobile onboarding screens and an integrated chat system.

EDUCATION

- BS, Medical Laboratory Technology** | University of Sialkot Oct 2022 – Jul 2026
- Clinical/Lab science background informing an interest in health tech and medical product design.
